

Project Initialization and Planning Phase

Date	25 September 2026
Team ID	SWTID-2026-1063
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Problem Statements:

Problem Statement 1

PS-1

I am (Customer):

A ServiceNow Incident user

I'm trying to:

Submit an Incident with all important information

But:

Important fields may be left incomplete

Because:

The form does not always enforce required field conditions automatically

Which makes me feel:

Concerned about incomplete Incident records

Problem Statement 2

PS-2

I am (Customer):

A ServiceNow Incident user

I'm trying to:

Update Incident information correctly based on Impact

But:

Related field values may not update automatically

Because:

Dynamic field behaviour is not configured

Which makes me feel:

Unsure whether the Incident information is consistent

Problem Statement 3

PS-3

I am (Customer):

A ServiceNow Incident user

I'm trying to:

Maintain Incident records without unwanted changes

But:

Users can directly modify fields from the Incident list

Because:

List-edit restrictions are not configured

Which makes me feel:

Concerned about unintended changes to Incident records
